Acknowledgements

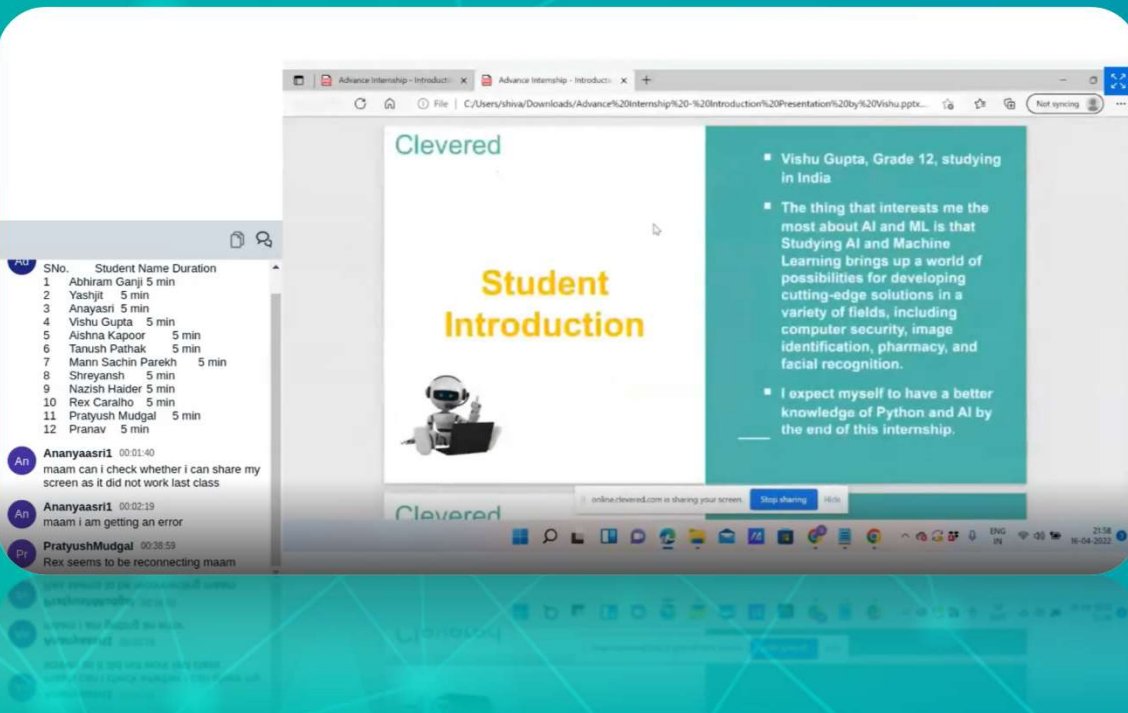

- I would like to thank Clevered for providing me with the opportunity to do internship under senior researcher at Oxford University: Dr. Ken Khan. I would also like to thank all the teachers in clevered for teaching me more about coding and AI which would be really helpful in my future. I would like to present my gratitude to Dr. Ken khan for his kind words and acknowledgements in the introduction class.

About Me..

My name is Vishu Gupta, I am in Grade 12, studying in India. The thing that interests me the most about AI and ML is that Studying AI and Machine Learning not only brings up a world of possibilities but also opens gate to a more creative and innovative world.

My Internship Journey with Clevered..

➤ I am delighted to have this amazing opportunity to do internship under Dr. Ken Khan.

➤ My internship experience with clevered was very professional, educational and amiable

Movie Recommendation System

Type the name of your movie

Avatar

Recommend

Aliens vs Predator Falcon Rising Independence Day Titan A.E. Aliens

This AI System is a program that recommends movies on the basis of the movie you watched and is a software that helps a human in making a decision of which movie he/she can watch in the future. This recommendation system is very efficient and covers numerous aspects other than just genres

How do I use the App?

My Music Recommendation System app is very easy to use as it has a list of movies to help the user find the movie(As shown in the picture).

My project not only returns the name of the movie but also returns the template(As shown in the picture) of the recommended movie which makes it easier for the user to identify and decreases the chance of error.

The background is a solid teal color. Overlaid on this is a network of white dots connected by thin white lines, creating a web-like pattern. The dots are of varying sizes and are distributed across the entire frame. The lines connect the dots in a non-uniform, organic manner.

Thank you!
